

DOCOMO ASIA to release IoT Solution Platform

- Improving the operations of Japanese manufacturing companies within Southeast Asia, contributing to production efficiency -

SINGAPORE, MAY 10, 2018 ---NTT DOCOMO ASIA Pte. Ltd. announced that it will commence services of IoT Solution Platform within Southeast Asia today. This service consists of IoT specialized software, jointly developed by DOCOMO ASIA and APPLIED TECHNOLOGY CO. LTD., which would be installed within the cloud, a network (Mobile Network, LPWA etc), to “visualize” data collected from several sensors, improving the operations of various industries such as manufacturing industry, contributing to the production efficiency.

With APPLIED TECHNOLOGY’s IoT advanced software development capabilities in specializing in the manufacturing industry and its problem-solving consultations from the customer’s perspective and NTT DOCOMO group’s IoT services for various industries acquired for long time, DOCOMO ASIA delivers this IoT Solution Platform to the customers.

This service has been adopted by MATSUI MFG CO., LTD, which accounts for a large share in the plastic molding equipment’s global market.

As a partner of B2B2X of the Japanese companies in Southeast Asia, DOCOMO ASIA and APPLIED TECHNOLOGY will continue to work alongside with customers to create new value through providing IoT solutions.

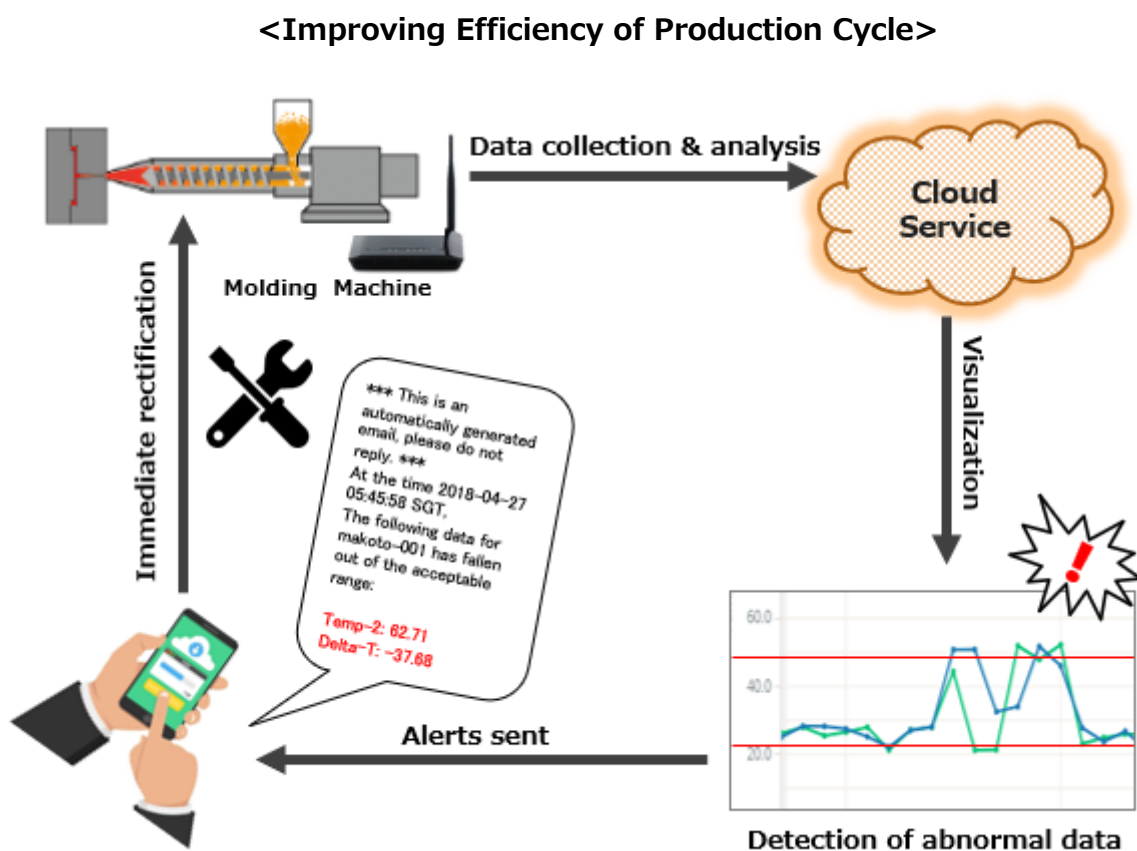

For details of the service, please refer to the attachment.

Attachment Outline of DOCOMO ASIA's IoT Platform

1. Main Features

- Provides a one-stop service from communication device to software
- Provides services at a reasonable price without capital investment
- Ensures high security and secure cloud service
- Provides the same service within Southeast Asia

2. Usage image (Plastic Molding Production Site)

3. Service charge

Initial Cost

Items	Contents
Initial Cost	Costs of set-up in server
Communication Modem	Communication modem device, Antenna, AC power supply

Running Costs

•Service usage fee (Mobile network usage included)

※Please contact us for details of the usage fee

4. Service Launch Date

May 10, 2018
